

Sports Bamboo Floorings LOWCOST

PERFORMANCE SERIES

Air-Flex Pro

Created for professional competitions.

Main Features:

High-performance sports bamboo floor; ideal for gyms. 14 mm thickness engineered elements – 4 mm thickness bamboo wearing layer – combined with the new Air Flex elastic pad, enhancing flexibility features of wood. This model has been developed for professional competitions.

Brief Technical Description:

Sports bamboo floor consisting of top layer made of engineered wood, 14 mm thickness, 4 mm thickness bamboo wearing layer, understructure made of continuous double plywood plates and Air Flex elastic pad. **Total thickness 68 mm.**

Technical Features:

The main steps of making PRO AIR-FLEX sports floor are the following:

1. Laying of 0.15 mm thickness polyethylene sheet on concrete;
2. Spring layer consisting of double plywood plates, 12 mm thickness each, total 24 mm; panels are stapled to each other;
3. "Air flex rubber cushion" elastic neoprene pad, 30 mm thickness, conic trapezoidal shaped, developed in order to ensure high flexibility; pads are stapled to the structure;
4. Top layer consisting of engineered elements, 14 mm thickness, 4 mm thickness bamboo wearing layer, nailed to the spring layer and laid by easy installation system;
5. Finishing with game line marking and colors on playground area according to the respective Federations' Rules.

“THE FUTURE OF LOWCOST SPORTS FLOORS IS BAMBOO”

Bamboo is an ecological product, modern, strong and highly wear-resistant. The cost is lower comparing to parquet that is normally used for sports facilities. Bamboo sports floor for gyms is a good alternative to traditional wood species, excellent for gyms and sports centers.

Renewing an old gym through our solution with sports bamboo floor is very easy and cheap; “Low cost”, a very popular term that well represents this web site and bamboo too.
