

Sports Bamboo Floorings LOWCOST

TRENTO BAMBOO

TRENTO Simple sports floor, easy carrying out , excellent for sports gyms and middle size sports facilities.

Technical description of sports bamboo floor model Trento

The main steps of making sports floor model TRENTO are:

1. Laying of a polyethylene sheet - 0,20 mm thickness - as anti-steam barrier, turned-up at the edges in order to make a small tank.
2. Laying of a PUR agglomerate mattress, 15 mm thickness, in order to make the flooring elastic and able to absorb players' impacts, according to the current international laws.
3. Laying of the bottom layer of the load distribution plate, 12 mm thickness made of plywood strips (5 plies).
4. Laying of the battens, 14 mm thickness, made of engineered parquet elements with tongue and groove joint, consisting of:
 - upper (wearing) layer, 4 mm thickness, bamboo
 - middle layer, 9 mm thickness, fir
 - bottom layer, 1 mm thickness, veneer wood.

The elements are nailed to each plywood strip of the bottom layer of the load distribution plate.

5. Game line marking with colors on Customer's choice and possible coloring of playing areas.

“THE FUTURE OF LOWCOST SPORTS FLOORS IS BAMBOO”

Bamboo is an ecological product, modern, strong and highly wear-resistant. The cost is lower comparing to parquet that is normally used for sports facilities. Bamboo sports floor for gyms is a good alternative to traditional wood species, excellent for gyms and sports centers.

Renewing and old gym through our solution with sports bamboo floor is very easy and cheap; “Low cost”, a very popular term that well represents this web site and bamboo too.
